

RC KPS EU

WALL MOUNT REMOTE CONTROL

Description

RC KPS is a wall-mounted control unit that allows you to operate KPS series amplifiers by adjusting zone volumes and selecting the corresponding sources. Featuring a discreet and elegant design, it suits all installation environments and is available in both white and black versions. The user interface consists of a practical rotary knob and a 1.1" color display with a resolution of 240x240 pixels. The color scheme can be changed to perfectly match the installation setting. Configuration is very simple and intuitive, and is carried out via the RDSpace software. Up to 8 control units can be connected to the same amplifier, while power is supplied via PoE.
